The SCOOP

Pet Sitters international Passionate. Professional. Pet Sitters.

Dear pet owner

As the year draws to a close, I would like to take this opportunity to thank you for your support of our pet care business in 2011.

We as a company could not have achieved the competency and confidence levels we did, without your ongoing support and feedback.

Most of the licensees (Pet Sitters) have achieved their internal pet care certification which enables them to better care for your loved ones. As a company, we have successfully completed over 1100 individual assignments in 2011 in many of the Cape Town suburbs.

As 2012 approaches, our vision for "excellent pet care to absent owners" will continue to develop and expand with your support.

We wish you and your family and your precious **pets**, a wonderful blessed and restful Christmas and new year. We look forward to assisting you in 2012

Best c@re - Leigh De Wet

Wishing you and your PETS a wonderful 2011 CHRISTMAS

Meet our pet friends

Canine Oral Health Care helps prevent periodontal diseases occurring. Brushing you dogs teeth is one of the most important aspects of dental care. Your dog should be introduced to tooth brushing very gradually, ensuring that they learn to enjoy the experience. This could take a few days.

You will need the following: Dog tooth paste (do not use human tooth paste) + clean hands and short nails + a pet tooth brush (medium bristles) + water + a quiet area + PATIENCE

Introduce the toothpaste by letting the dog lick the toothpaste off you finger.

Get the dog used to the contact with its mouth by sliding your finger and tooth paste gently into their mouth.

Introduce the toothbrush. Gently hold the mouth open and start brushing gently, starting with the back teeth, then the front. This must be done carefully and playfully. Do not put the dog under pressure. This may take days. For maximum protection, tooth brushing should be done daily. As Winston Churchill stated "Never, never, never, give up".
